

Pole Piece Parts

The following is a break down of hardware included with each pole purchase.

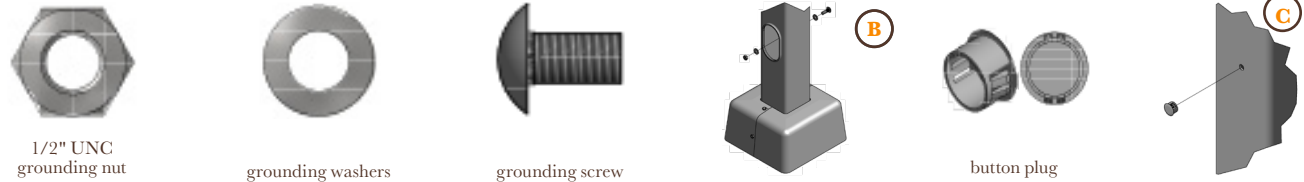

Pole Cap

Poles caps are used to cover top of pole on drilled mounts.

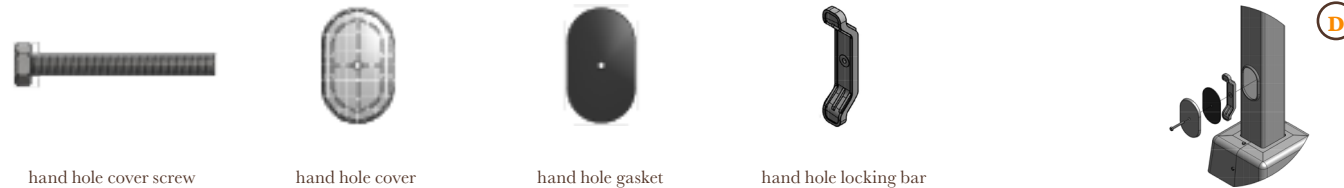

Grounding Bolt and Button Plug

The poles must be hung in order to travel through the powder coat booth. We do this by drilling(3) holes in the pole. The holes at the top are plugged while the hole at the bottom of the pole is utilized as the Grounding Lug.

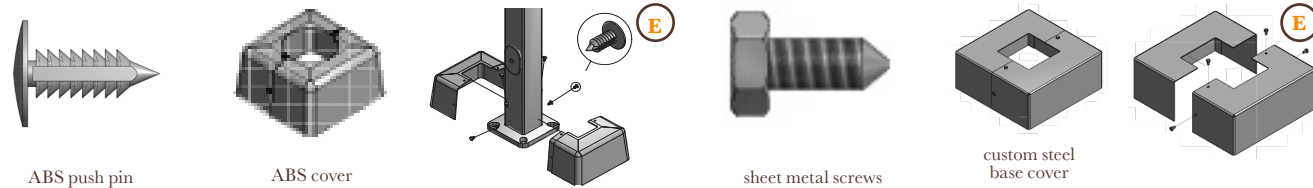

Hand Hole Cover

Hand hole cover with gasket and back bar. Hand hole covers are supplied with a water-proofing gasket. Peel the backing and secure to the inside of the hand hole cover.

Steel Anchor Based Poles

Two-piece base cover with 4 push pins. The standard base cover is a two-piece ABS plastic that is secured with 4 push pins

Aluminum Poles

SAE washers and base plugs for anchor bolt poles.

7" and 8" Round Tapered Aluminum Poles

Shoe base and nut covers.
